PIX4DMATIC FOR CRASH RECONSTRUCTION AND FORENSICS

VIRTUAL / INSTRUCTOR-LED

This virtual 2 day course will provide attendees with the necessary instruction to successfully process a crash or crime scene using aerial photogrammetry with Pix4Dmatic software. This training provides a "crash/crime scene to courtroom" workflow utilizing Pix4Dmatic generated ortho-mosaic images and point cloud data in third party crash reconstruction and forensic software. Use of the Pix4Dcatch mobile application and the Pix4Dcapture Pro flight planning application will be covered. Course includes a full access Pix4Dmatic license for each student. Acceptable laptop specifications are available on our website. Course is ACTAR approved for 16 CEUs.
